Airlight
THINKING AHEAD

Addressable
Flame Proof Manual Call Point
Model – **AA103FCP**

Features:

- ✓ Attached hammer for activation
- ✓ Flame-proof enclosure

Specifications

General specifications

Compatibility	AU101X Protocol
Type of protection	Flameproof- Exd
Apparatus standard	IS-2148/81

Mechanical specifications

Dimensions (HXW)	215X105mm
Weight	3kg (Approx.)
Material	Aluminium Lm6
IP Protection	IP 65
Finish	Anti-corrosive epoxy powder coated
Cable entry	2 x 3/4" ET
Gasket	Neoprene
Hardware	Stainless Steel (SS-304)
Approvals	CCE

Overview:

This addressable device is intended to be used for a manually operated fire alarm system. Enclosure of this unit is designed for outdoor, where flammable gases are involved

The unit is supplied along with a hammer and chain. When anyone notices fire, they can just activate this unit by breaking the glass. This device being addressable, the system can automatically indicate the location at the display of the panel monitor, as well as to trigger appropriate speakers/sounders to alert/evacuate and leaving other areas undisturbed.

Electrical specifications

Operating voltage	24V DC
Quiescent current	200µA
Alarm current	400 µA
