DATA SHEET

Addressable Flame Proof Manual Call Point

Model - AA103FCP

Overview:

This addressable device is intended to be used for a manually operated fire alarm system. Enclosure of this unit is designed for outdoor, where flammable gases are involved

The unit is supplied along with a hammer and chain. When anyone notices fire, they can just activate this unit by breaking the glass. This device being addressable, the system can automatically indicate the location at the display of the panel monitor, as well as to trigger appropriate speakers/sounders to alert/evacuate and leaving other areas undisturbed.
